

C. *mecA* + ACME cassette (JE2) + flanking regions

Functional module (number = diagonal block outline)

1.

cell wall homeostasis
2.

HVR+mecA (mecA cassette)
3.

cassette replication (mecA cassette)
4.

putative defense module (mecA cassette)
5.

arginine catabolism (ACME)
6.

nickel/oligopeptide ABC transporter (ACME)
7.

copper resistance (ACME)
8.

sulfide response
9.

sulfide response (split sqr gene)
