

D. gene SHAP effect on mecA vs. co-occurrence

● < 100 genomes in ≥ 1 combination (n=1,296, excluded from fit)

● ≥ 100 genomes in all 4 combinations (n=4,187, used for fit)

— Line of best fit — $y = 1.2115x + 0.0355$ ($R^2 = 0.021$, $p = 3.72e-21$)
