

A. core genome — capsule region

Functional module (number = diagonal block outline)

- | | |
|--|-------------------------------------|
| 1. phosphonate ABC transporter | 6. CapHIJK (variable region) |
| 2. RosmerTA bacteriophage defense addiction | 7. CapLMNOP |
| 3. CapABC | 8. sulfonate ABC transporter |
| 4. CapDE | 9. aureusimine biosynthesis |
| 5. CapFG | 10. arginine biosynthesis |
